Y E S H I V A T M A ' A L E A D U M I M

It is our intention to establish a Y e s h i v a t H e s d e r in the settlement. The Yeshiva is to begin functioning this coming fall. In its first stage the Yeshiva is planned for thirty young men. The students will be Yeshiva-High school graduates, conscripted into the army. As such they are to be engaged in both Torah learning and Military training during a period of four and a half years. Therefore their contribution will be to the physical and spiritual strengthening of the settlement and to the defense of Jerusalem in case of an emergency.

We hope that the Yeshiva students will influence the cultural atmosphere of the settlement. In the long run the Yeshiva will constitute a nucleus of a Jewish Spiritual Centre for all the settlements in the Jericho Valley and the Judean Desert.

The establishment of " Y E S H I V A T M A ' A L E A D U M I M " has been approved by the Union of "Yeshivot Hesder" and by the Ministry of Defence.

Although the Yeshiva is an enterprise of the settlement, we hope to receive financial assistance from the Government and from private donators.

You are invited to take part in the planting of trees on Tu Bi'Shevat, February 3rd, 1977, on 10.00 a.m. at the site of the planned Yeshiva, at the Ma'ale Adumim Settlement.

With the blessings of the Torah and the Land

Ma'aleh Adumim is the first and (for the time being) the only settlement in the Judean Desert. It is located between Jerusalem and the town of Jericho.

A year ago, thirty seven families came to make Ma'ale Adumim their home. Many more families await the completion of building of additional housing units. The social background of the settlers is broadly diversified. We come from different types of cultural groups, skills, professions and political factions; we think that our greatest social achievement is the successful co-existence of observant and non-observant in such a small settlement; this was achieved due to a great deal of mutual tolerance and respect.

The settlement is not sponsored by any political group. All municipal functions and contacts with the outside are handled by the democratically elected leaders of the settlement. All the community work is done on a voluntary basis by all the settlers. In this way ideals such as voluntary work and mutual help are actualized daily as part of our way of life.

Five of us were the first to initiate the establishment of small scale industry in the neighbouring new industrial area. Soon an additional two thousand square meters of industrial units, now being built, will enable further industrial growth.

We believe that, on our part, we have proved our ability to establish a viable community despite all obstacles. Our main goal at present is the establishment of a permanent settlement in this part of our country.

WE REQUEST AN IMMEDIATE DECISION BY THE GOVERNMENT OF ISRAEL TO THIS EFFECT.
